

About Foxit Corporation

Founded in 2001, Foxit Software Company is the industry leader in the OEM licensing of industrial standard electronic document solutions including in ISO 32000 PDF.

In 2004, Foxit launched its award winning product Foxit Reader, a small and fast PDF document viewer with extremely easy-to-use features and Foxit's best-selling desktop software Foxit PDF Editor. With over 90 million Foxit Reader downloads worldwide, Foxit software has become a high quality, affordable and popular alternative to other PDF software tool suppliers.

In 2009, Foxit Software Company was incorporated as Foxit Corporation. Today Foxit has offices in US, China, Japan, Taiwan, Korea and France.

Foxit's corporate vision combines our core values of innovative, standards-based technology and unrivalled customer support, with a deep commitment to sustainable, environmentally-sound products and services for the global business community. With operations spanning the globe, Foxit Software is at the forefront of cost-effective, collaborative document management solutions for today's distributed enterprise.

Foxit's award winning software products include software applications for reading, creating, organizing and securing PDF documents.

Foxit PDF solutions range from handhelds to desktop to enterprise to on demand enabling businesses worldwide. Customers who license Foxit technology for use in their products include Microsoft, Intel, Hewlett Packard and Amdocs.

Foxit recently introduced a complete PDF Security Suite for enterprises to deliver cost effective PDF policy protection and PDF reader extensions capabilities to any business running Microsoft Windows Server® or Sharepoint® with Active Directory® Rights Management Services (AD RMS). Foxit PDF Security Suite includes the Foxit RMS and Foxit Phantom products making it easier to protect sensitive PDF documents to prevent loss of valuable company assets, manage AD RMS policy templates associated with PDF documents and view the protected documents. Foxit is also a pioneer in offering OnDemand CM, a service-based content management system, built on a patent pending technology. On Demand Content Management makes it easier to access, render, route and share documents easily over the web with high performance and integrity. Finally, the growing popularity around Foxit ebook reader eSlick Hardware has already been making waves in the market. Foxit eSlick enables one to read books, favorite novels, magazines etc on the go and fits into the hand just like the palm desktop.

Foxit Development Teams

Foxit Corporation now has many experienced experts and engineers working in five different teams:

- Foxit PDF Core Technology Development
- Foxit PDF User Interface Development
- Foxit PDF Customization Development
- Foxit PDF Mobile Technology Development
- Foxit Networking Application Development

About Our Goal

Foxit Corporation has positioned itself to be a PDF technology solution provider and it has become an alternative to Adobe for many PDF users. Foxit is dedicated to providing high-quality products for PDF file printing, PDF displaying, PDF graphic designing, and PDF text processing. Foxit will keep its development efforts on enabling electronic books, business document exchange, document archiving, digital rights management etc. Also Foxit will actively contribute to new PDF standards.
